SUMMARY

Computer Science student building AI-driven applications and automation tools using Python, RAG, LLM APIs, and full-stack web technologies. Seeking an AI Application Developer internship to re-imagine business workflows with AI and deliver scalable internal tools.

SKILLS

Languages: Python, JavaScript, TypeScript, C++

Web & Frameworks: HTML, CSS, React, Next.js, Node.js, Express.js, Flask

Databases: MongoDB, MySQL, SQLite, ChromaDB (vector DB)

AI & Automation: LLM APIs (Gemini), RAG, Embeddings (Hugging Face), Prompt Engineering, Python automation

APIs & Tools: REST APIs, Postman, Git, GitHub, Firebase, Cloudinary

Data & Dashboards: Power BI, Excel, Google Sheets

Cloud: Google Cloud, Vercel

PROJECTS

Bharat AI - Personal AI Assistant (RAG Pipeline)

*Python, Flask, ChromaDB,
Next.js*

- Built an end-to-end RAG assistant that converts structured JSON data into embeddings (all-MiniLM-L6-v2) stored in ChromaDB for semantic retrieval.
- Integrated the Gemini API through a Flask REST API, serving relevant context with similarity filtering to improve answer accuracy.
- Delivered streaming responses and voice interaction (speech-to-text, text-to-speech) via a Next.js / React / TypeScript frontend.

YAOP Community Platform

*Next.js, Express.js, MongoDB,
Firebase*

- Developed a full-stack platform to manage events, volunteers, and donations on a centralized MongoDB database.
- Implemented Firebase authentication and validation workflows to keep donation records accurate and consistent.
- Built an admin dashboard that streamlined data entry and record updates, reducing manual effort by ~40%.

JOJO Store - Full-Stack E-Commerce Platform

*Next.js, TypeScript, Firebase,
Stripe, Cloudinary, Tailwind CSS*

- Built a full-stack e-commerce storefront and admin dashboard with product search, cart, checkout, inventory, and order management.
- Integrated Firebase authentication and Firestore data workflows, Stripe payments, and Cloudinary product image uploads.
- Designed responsive, animated interfaces with Framer Motion, keyboard-accessible dialogs, and reduced-motion support; added UI interaction tests with Vitest and React Testing Library.

INTERNSHIP

Web Development Intern - InAmigos Foundation

May 2026 - Jun 2026

- Developed and maintained website features using React, Node.js, and MongoDB.
- Built and redesigned page layouts with HTML, CSS, and JavaScript, improving usability and maintainability.
- Collaborated with the team to deliver updates on schedule.

EDUCATION

B.Tech in Computer Science - Pillai College of Engineering, Panvel

2023 - 2027

CGPA: 8.74 / 10.0 | Coursework: DBMS, Data Structures, AI/ML, Web Development

CERTIFICATIONS

- **Google Cloud Data Analytics Certificate** - cloud-based data pipelines, analysis, and structured reporting.
- **Google Cloud Career Launchpad (Foundations Track)** - cloud computing fundamentals, data management, analytics.
- **Microsoft Power BI - The Complete Guide** (Infosys Springboard).
